PROFESSIONAL SUMMARY

AI/ML Engineer with 2.3+ years of experience building production-ready GenAI applications, LLM-powered agents, RAG systems, and scalable backend services. Experienced in Python, FastAPI, LangChain, LangGraph, Pydantic AI, MCP, vector databases, AWS, and Docker. Skilled in developing AI-driven automation, intelligent retrieval systems, and real-time applications with a focus on scalability, reliability, and observability.

EDUCATION & CERTIFICATION

Bachelor Of Computer Application
Year : 2020 - 2023

College : Sutex Bank College of Computer Applications and Science - Surat

Master of Science in Artificial Intelligence and Machine Learning
Year : 2023-2025

University : Veer Narmad South Gujarat University - Surat

TECHNICAL SKILLS

- **Programming**: Python, TypeScript, React.js, SQL
- **AI/ML**: Machine Learning, Deep Learning, NLP, Computer Vision, LLMs, RAGs, AI Agents, Agentic AI, MCP, Prompt Engineering, System Design, A2A, Multi-Agent Systems
- **AI Frameworks**: TensorFlow, Keras, Scikit-learn, Hugging Face Transformers, LangChain, LlamaIndex, LangGraph, Strands, Pydantic AI, CrewAI, Google ADK, Flask, FastAPI, FastMCP
- **Vector & Databases**: FAISS, ChromaDB, Qdrant, Milvus, PGVector, Elasticsearch, Pinecone, SQL Server, MySQL, PostgreSQL, Supabase
- **Cloud & DevOps**: AWS, GCP, Amazon Bedrock, Amazon Bedrock AgentCore, Docker, Kubernetes, Git, GitHub Actions, GitHub Workflows, CI/CD
- **Evaluation & Observability**: Amazon Bedrock Evaluations, DeepEval, Langfuse, Arize Phoenix, OpenTelemetry, Pydantic Logfire

WORK EXPERIENCE

AI/ML Engineer - WebContrive Pvt. Ltd., Surat
July 2026 – Present

- Developed production-ready GenAI applications, AI agents, and RAG systems using Python, FastAPI, LangChain, Pydantic AI, and vector databases.
- Built AI-powered solutions involving MCP, LLM tool calling, intelligent retrieval, multimodal document processing, and workflow automation.
- Integrated AWS AI services, PostgreSQL, Redis, Docker, and LLM APIs into scalable backend systems.
- Implemented LLM evaluation and observability using OpenTelemetry, Pydantic Logfire, and evaluation frameworks.

AI/ML Developer - BitCoding Solutions Pvt. Ltd., Surat
January 2025 – June 2026

- Developed LLM-powered applications, RAG pipelines, conversational AI systems, and AI agents using Python and modern GenAI frameworks.
- Built document-processing and knowledge-retrieval workflows using embeddings, vector databases, semantic search, and LLM-based reasoning.
- Developed REST APIs using FastAPI/Flask and integrated AI workflows with databases and external services.
- Worked with LangChain, LangGraph, Hugging Face, Milvus, ChromaDB, and cloud AI services to deliver scalable AI solutions.

Full Stack Developer Intern - Karon Infotech, Surat
December 2022 – April 2023

- Developed and maintained full-stack web applications using Python, React.js, and backend APIs.
- Implemented frontend interfaces, REST APIs, database operations, and application workflows.
- Collaborated with team members to troubleshoot issues and deliver application features within project requirements.

PROJECTS

ShopASO - AI-Powered App Store Optimization Platform

- Architected a production-ready FastAPI, React, and Vite platform for Shopify App Store keyword tracking, competitor analysis, and listing optimization.
- Engineered a Playwright-based headless scraping pipeline with automated screenshots and real-time ranking verification, supported by Recharts analytics for ranking trends and competitor benchmarking.
- Built an OpenAI-powered ASO audit agent using Pydantic AI and implemented OAuth/JWT, multi-tenant RBAC, Slack alerts, Redis caching, PostgreSQL optimization, and distributed observability.

Tech Stack: Python, FastAPI, React.js, Vite, Playwright, Recharts, OpenAI, Pydantic AI, PostgreSQL, Redis, OAuth, JWT, Slack, OpenTelemetry, Pydantic Logfire

NotionMind FastMCP Gateway

- Architected an end-to-end FastMCP Gateway connecting hierarchical Notion documentation with AI agents and IDEs such as Cursor and Claude Desktop through MCP tools.
- Built a recursive Notion crawler and multimodal embedding pipeline using ChromaDB and OpenAI CLIP for text and image-based semantic search.
- Developed a Pydantic AI + Google Gemini RAG agent with dynamic collection routing, citation validation, OAuth 2.0 PKCE/Google SSO, granular access control, and LLM observability.

Tech Stack: Python, FastMCP, MCP, Pydantic AI, Google Gemini, ChromaDB, OpenAI CLIP, Streamlit, OAuth 2.0, JWT, Arize Phoenix, OpenTelemetry, Pydantic Logfire

ClaimSense AI - AI-Powered Insurance

- Built an AI-powered underwriting assistant for multi-sheet health-claim Excel files, normalizing inconsistent data and generating structured JSON for downstream systems.
- Integrated Claude Sonnet 4.5 for intelligent column identification, multilingual Spanish/English schema mapping, missing-field recovery, and resilient data extraction.
- Developed a robust Excel ingestion and validation pipeline with Pandas, OpenPyXL, Flask, and Streamlit, implementing business-rule validation and row-level audit reporting.

Tech Stack: Python, Claude Sonnet 4.5, Flask, Pandas, OpenPyXL, Streamlit, REST APIs, LLM, Data Validation

DocVision AI - Multimodal Document Intelligence

- Developed a FastAPI document intelligence microservice for PDF processing, configurable summarization, structured responses, and observability.
- Integrated Anthropic Claude through Amazon Bedrock and AWS Textract for multimodal document analysis, OCR, technical summarization, and evidence-backed QA.
- Implemented visual grounding and defect localization using spatial reasoning, grid overlays, and vision-language inference to generate issue bounding boxes.

Tech Stack: Python, FastAPI, Anthropic Claude, Amazon Bedrock, AWS Textract, OCR, Multimodal LLMs, PDF Processing, Vision-Language AI

ChainIQ - MCP Server & Intelligent Retrieval

- Built a FastMCP server with structured tool registration and dynamic orchestration for LLM-driven retrieval and documentation workflows.
- Designed a tool registry supporting semantic search, vector similarity, tool chaining, and context-aware document retrieval using Milvus.
- Developed LLM-compatible tool interfaces, documentation retrieval workflows, health monitoring, structured logging, and performance tracking for production-ready observability.

Tech Stack: Python, FastMCP, MCP, Milvus, Vector Search, Semantic Retrieval, LLM Tool Calling, REST APIs, Structured Logging

IntelliCode Assistant - AI-Powered VS Code Extension

- Developed an AI-powered VS Code extension with a FastAPI backend for context-aware code suggestions, documentation insights, and automated refactoring.
- Built a code knowledge base using embeddings and hybrid semantic search, with Zilliz Cloud/Milvus for scalable indexing of code and GitHub repositories.
- Engineered prompt orchestration to inject relevant code context into GPT-5, enabling file-level recommendations and real-time AI-assisted code modifications through a directory graph interface.

Tech Stack: Python, FastAPI, VS Code Extension, GPT-5, Zilliz Cloud, Milvus, Embeddings, Hybrid Search, RAG, GitHub
